# SOIL SCIENCE

JACOB G. LIPMAN  
Editor-in-Chief

A monthly journal devoted to the broader outlook of the entire field of soil fertility. Articles dealing with the more important facts, observations, deductions and problems of soil biology, soil chemistry, and soil physics are published. Papers devoted to plant physiology, agronomy, bacteriology, or geology, are accepted for publication if they contribute directly to the knowledge of soil fertility. The study of the mineral and organic constituents of soils, soil gases, soil water as a solvent of soil material, soil colloids, the transformation of commercial plant-foods in soils, questions that deal with the fundamental facts of soil fertility and productivity are given due consideration. The phenomena concerning soil micro-organisms, such as bacteria, molds, protozoa, and algae, receive careful attention.

Published monthly. Two volumes (1000 pages) a year are issued. Illustrated. Price, Vols. V and VI (1918), \$5.00 domestic; \$5.50 foreign. Back volumes, I-IV incl., per volume, \$3.00 domestic; \$3.50 foreign. Send for Contents Bulletin.
